Texts:

[Lilienfeld](#), S. O., Lynn, S. J., Ruscio, J. & Beyerstein, B. L. (2010). 50 great myths of popular psychology: Shattering misconceptions about human behavior. Malden, MA:Wiley-Blackwell. *In general, we shall be discussing readings from this text on Fridays.*

[Stanovich, K. E.](#) (2010). How to think straight about psychology. 9th edition. New York: Allyn & Bacon. *In general, we shall be discussing a chapter from this text on Thursdays.*

Ancillary text (You need **NOT** purchase it. This is the text used in all OTHER sections this semester). Myers, D.G. (2010). Psychology (9th ed.). New York: Worth Publishers

About your professor:

While I was an undergraduate at Oberlin College in Ohio, I explored a number of different majors including Education and Spanish before deciding upon a psychology major during my junior year. I developed research skills while at The Ohio State University where I earned both my Master’s and Ph. D. degrees. My major emphases of study were social psychology (persuasion; attitude measurement) and statistics. I have published articles in the Bulletin of the Psychonomic Society, the European Journal of Social Psychology, Journal of Personality and Social Psychology, Social Cognition, and the American

Psychological Association Monitor. I am on the editorial board as a reviewer for the electronic journal PsyCRITIQUES which publishes book reviews.

Since coming to Carroll in February of 1978 I have taught Introductory Psychology, Statistics and Experimental Design, Social Psychology, Psychological Testing and Assessment, special courses (e.g. “Why War?” and “The Psychology of Happiness”) and the Research Seminar. I also have taught the First Year Seminar “Pioneering 21st Century Internet Tools”. I very much enjoy teaching and learning.

My wife Debbie Schmidt and I reside in a house at North Lake, Wisconsin--- a thirty minute drive from Carroll. I love dogs and have a five-year-old Newfoundland, Robin who loves the water---and the snow. My father-in-law Walter Schmidt, who recently passed away, graduated from Carroll in 1938 and has a dog named Freud who often stays with us.

What Are My Course Objectives?

1. To introduce students to the breadth of topics investigated by psychologists
2. To improve students’ ability to think clearly
3. To acquaint students with research methods used by psychologists
4. To increase students’ self-understanding
5. To familiarize students with fundamental psychological concepts and principles

How will these objectives be met?

1. Formal lectures addressing the basic topic each week
2. Experiential learning through your participating in classroom demonstrations
3. Class discussion
4. Student writing and presentations
5. Responsible student behavior
 - a) Attending class alert, on time, and prepared
 - b) Taking all examinations honestly and on time
 - c) Participating actively in class-related activities
 - d) Sharing learning from other classes related to psychology
 - e) Relating what you learn from this course to your life
 - f) Coming to see me to learn more, to share, or to seek help

How will student learning be measured?

1. Examinations:

Each of the four scheduled examinations will cover the assigned reading from the texts and material presented exclusively in class. Exams will cover lectures, handouts, discussions, demonstrations, and videotapes and will consist of multiple choice, short answer, completion, and short essay questions.

Cheating will not be tolerated.

2. Class Participation /Presentations /Papers/Course Development Exercises:

Throughout the course you will have opportunities to participate in experiments, write short reaction papers, use information technology and library resources, make oral presentations, and engage in structured group exercises. The quality of your performance on these learning opportunities will affect your final grade if you are on the “borderline” between two course grades. It will also affect what kind of letter of recommendation I write for you---if you ask me to write one.

If you miss an examination:

Should you unavoidably miss an examination, please contact me immediately with an honest explanation for your absence. I advise any student missing more than one examination to drop the course.

Class attendance:

I expect you to attend class and to arrive on time prepared to learn.

Final examination:

The final examination will be cumulative and of the same format as regular exams.

Grades:

Based on your performance on four 100-point regular examinations and the 100 point cumulative final examination:

A = 465 to 500

AB= 450 to 464

B = 415 to 449

BC= 400 to 414

C = 350 to 399

D = 300 to 349

F = Below 300

Reading Assignments:

- | Week of | General Topic |
|----------------|---|
| January 18 | What Do Psychologists Do?
Research Methods; Thinking Critically With Psychological Science

Monday, April 18 Examination # 4 (100 points)

April 19 Special Topics in Psychology

April 25 Reflection, Assessment, Review for Final Examination

Final Exam Friday April 29 8:00 – 11:00**Carroll Policy Statements**

Statement on Academic Integrity – The Carroll Academic Integrity Policy is located in your student handbook. I encourage you to familiarize yourself with it. If a student violates this policy in any way, I reserve the right to impose a sanction of failure on the assignment/assessment or failure in the course. If you have questions about appropriate citations, please ask.

Accommodation for Disabilities – Any requests for accommodation must be made through the Disability Services Coordinator at Carroll. I will make appropriate accommodations once I receive notification from that office.

Modifications to the syllabus: The instructor and Carroll reserve the right to modify, amend, or change the syllabus (schedule, course requirements, grading policy, etc.) as the curriculum and/or program require(s).
